YOU DON'T NEED A LOWER PRICE. YOU NEED A GUARANTEE.

SWIPE ›

THE PATTERN

"If I just drop it by $500, they will sign today. Right?"

Let me think about it and circle back.

Sure, no rush. Take your time.

What if it does not work for me?

The silence is not about the price

It is about risk. They cannot see how they safely win.

THE REFRAME

BEFORE

🔽 Lower the price → more pressure, same ghosting

PRICE DROP = PANIC SIGNAL

↓

AFTER

🛡️ Add a guarantee → less pressure, easier yes

RISK REVERSAL = TRUST

A guarantee sells what a discount cannot.

Discounts answer "how much." Guarantees answer "what if I fail."

THE TOOLKIT

4 risk reversals that close premium offers

The outcome guarantee

Tie the promise to a specific result they can measure. No result, money back.

The timebox promise

First value delivered inside X days. Refund window opens if not.

The do-over clause

We rework the deliverable until it lands. They never pay for a miss.

The first-step pilot

Small paid test before the full engagement. Earn trust, then expand.

THE DIFFERENCE

Discount vs. Guarantee

SIGNAL	DISCOUNT	GUARANTEE
Buyer feels	Pressured	**Protected**
Perceived value	Commodity	**Premium**
Client quality	Bargain hunters	**Outcome seekers**
Margin impact	Permanent cut	**Fully protected**
Close speed	Stalls after	**Shortens cycle**

THE MOVE

3 steps to build your risk reversal

1. **Name the exact fear behind the pause**
   Is it wasted money, wasted time, or wrong fit? One fear, not three.

2. **Build the promise around that fear**
   Your guarantee must cancel the specific risk they feel, not a generic one.

3. **Say it in plain language, not legalese**
   If a stressed buyer cannot repeat it, your guarantee does not sell.

PRO TIP

The stronger your guarantee, the fewer objections you hear. Silence becomes a signed contract.
