You lowered your price to "get more clients."

You got more tire-kickers instead.

Serious buyers walked past without looking.

Your low price is not a discount.

It's a signal.

It tells the market: "I'm not sure what this is worth."

Serious clients don't buy cheap.

They buy certainty.

Your price is the first proof of certainty you give them.

What a low price actually attracts:

- Buyers who will negotiate again
- Buyers who need convincing
- Buyers who compare you on cost
- Buyers who ghost after one session

Cheap price: "Is this legit?"

Premium price: "This must be good."

Same work. Different reaction. Different client.

Raise your price by 40%.

Tighten your offer to match.

Watch the people who say yes. Those are the clients you were built for.
